

Working Title of the Paper

First Author^a, Second Author^b, and Third Author^a

^a*First Institute, First University, Country*

^b*Second Institute, Second University, Country*

Abstract

One paragraph summarising the problem, what was done about it, and what came out. State the gap in the first two sentences, the approach in the middle, and the headline result at the end¹. Keep it to the word limit of the target journal.

⁵ Synopsis

Two sentences on why this matters beyond the immediate field, if the target journal asks for a synopsis or significance statement.

Keywords

first keyword, second keyword, third keyword, fourth keyword

¹⁰ 1 Introduction

Open with the wider context and narrow towards the specific gap this paper closes^{1,2}. One paragraph per step of that narrowing usually suffices.

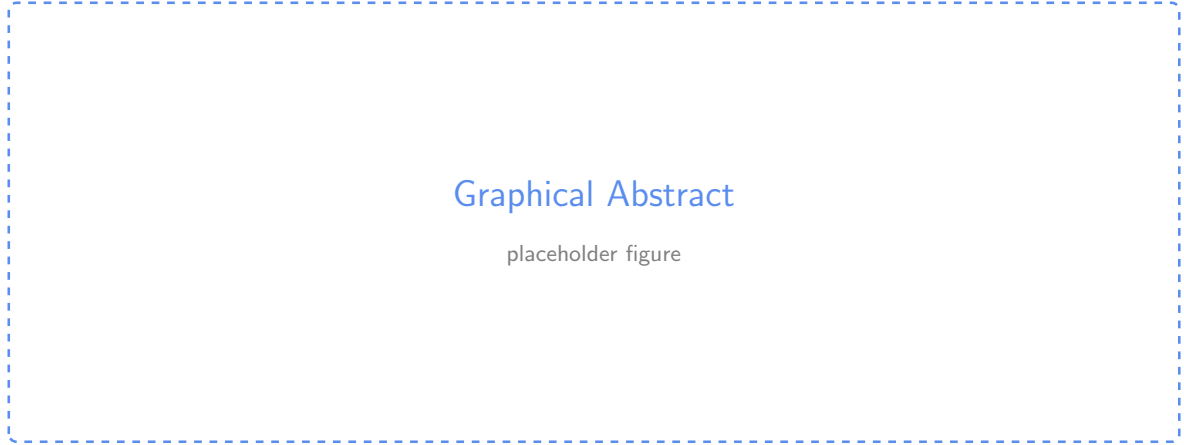

Figure 1: Graphical Abstract.

State what remains unresolved, and why the existing approaches cannot resolve it³.
Be concrete about the limitation rather than listing papers.

15 Close the introduction by saying what this work does, in the order the rest of the
paper presents it.

2 Methods

Describe the approach so that someone else could repeat it. Introduce notation once and
use it consistently: let $\mathbf{x}$ denote the vector of decision variables and $\mathbf{A}$ the coefficient
20 matrix, so that

$$\mathbf{A} \mathbf{x} = \mathbf{b}, \tag{1}$$

where $\mathbf{b}$ is the demand vector. Refer back to Eq. 1 rather than repeating it.

2.1 First Component

Split the methods into the components a reader needs in order. Each subsection should
answer one question.

25 2.2 Second Component

Where a figure explains the structure better than prose does, use one.

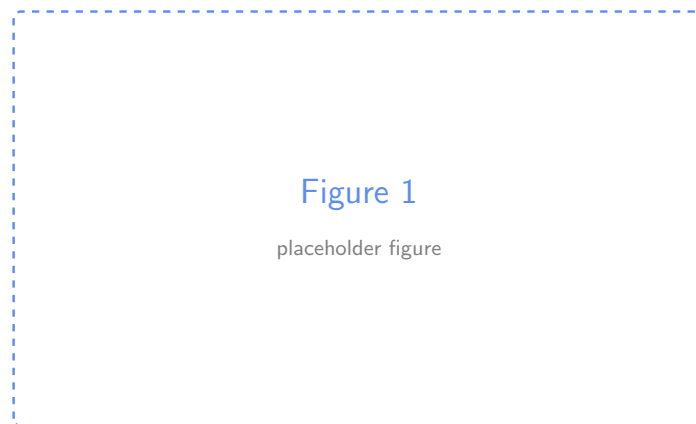

Figure 2: Caption stating what the figure shows and what to take from it.

2.3 Implementation

Name the software, the versions, and where the code lives. Point at the documentation rather than reproducing it.

30 3 Results

Set up the case or dataset first, then report what it produced. Quantify: state the number, its unit, and what it should be compared against.

Walk through Fig. 3 in the order a reader meets it, and say what each panel establishes.

4 Discussion

35 Say what the results mean for the gap identified in the introduction, without restating them.

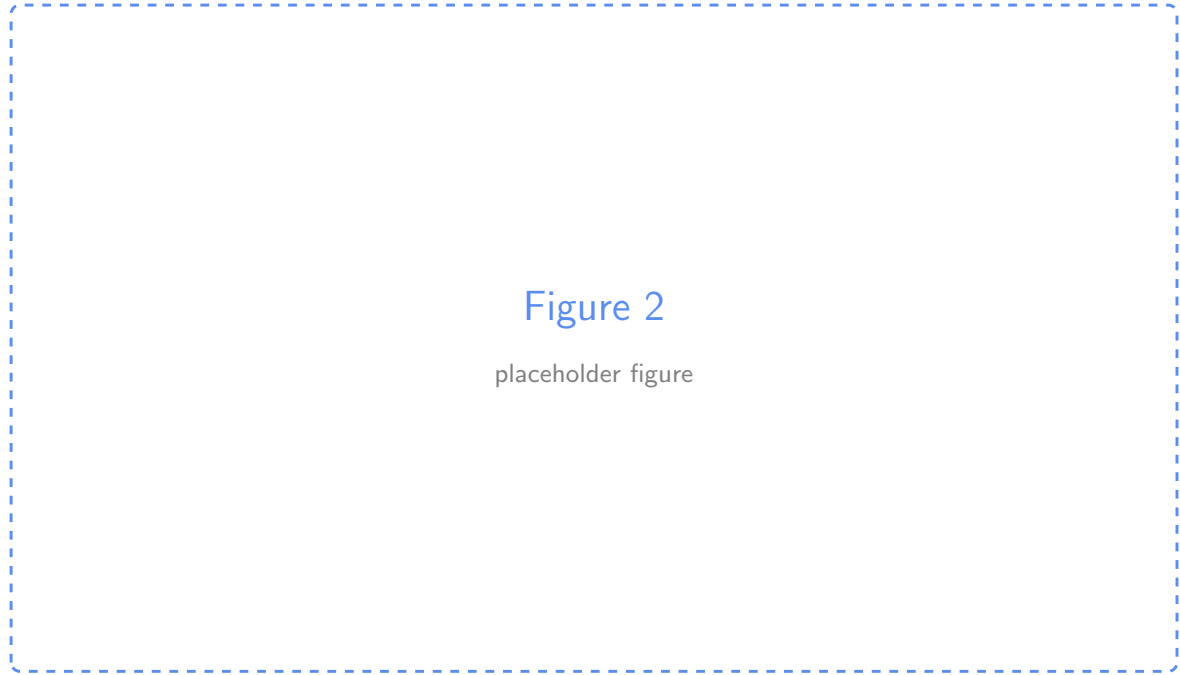

Figure 3: Caption stating what the figure shows and what to take from it.

4.1 Limitations

State the assumptions that would change the conclusions if violated, and how far they can be relaxed.

40 4.2 Outlook

Name the concrete next steps this work makes possible.
